

# Asset Management

## Asset Management

Assets control is becoming important. Manual Assets recording that previously done manually by Excel will be abandoned.

Because You need fast & accurate information for Your decision-making process such as: How much Your assets depreciation value? or where are the location of Your assets?

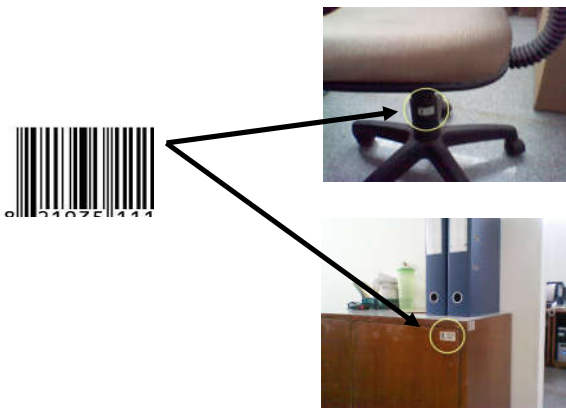

## What Data?

Asset Data that are inputted in the system, not only recorded by list of fix Assets, but also can be differentiated between type and category of the Asset. Such as Building, Machine, Vehicle, Furniture & Fixture, Computer, etc. All documents can be stored in the system such as, PO, Supplier Invoice, Delivery Note, Payment Receipt, and Tax Receipt.

## Complete Features

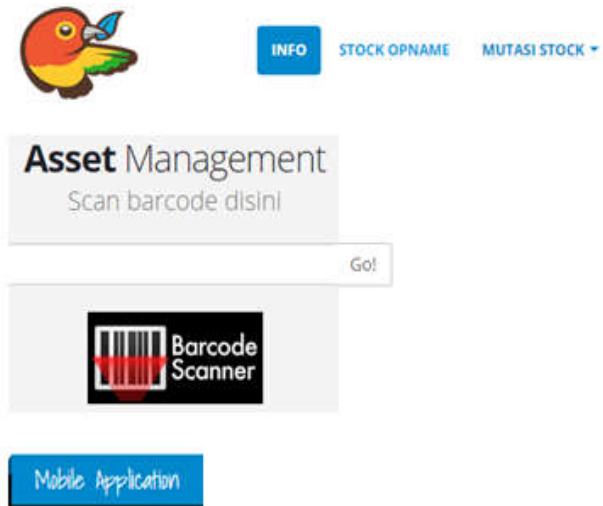

Web based system that facilitate control, and detailed record, such as Asset Detail, Asset Grouping, Barcode Tagging, Asset Transfer, Asset Maintenance, Asset Depreciation, and Dashboard Reporting.

## Barcode System

Barcode Label are used as Asset Identification and connected with Mobile Application that is used for control & manage during Asset Audit.

## Mobile Android Application

For inventory taking during physical check or Asset Audit.

## Asset Detail

**Asset Data Files :**

| General                     | File Documents        | Maintenance   |
|-----------------------------|-----------------------|---|
| <b>Honda Supra Fit</b>      |                       |   |
